

A roped in area across from the museum entrance was set aside for the display of microcars but actually roaming around the campground area one saw as many or more vehicles and various old and new car parts. You ask, "What kind of cars were there?" BMW 300's, 600's, Messerschmitts, and Goggomobils were well represented. Examples represented almost every model made by the companies. Other brands such as Heinkel, Lloyd, Scootocar, Glas, Kleinschnitger, NSU, and Vespa 400 were also present. I asked someone if Berkeleys ever were at the event and was told they rarely appear. However, on Saturday morning a blue four-wheel model was spotted on the side of the access road in front of the museum. It looked in good shape but I could not find the owner. A few minutes later I returned to the area to find the car had disappeared. I returned later to observe the Berkeley

returning to the same area. I went over to say to the owner that I was pleased to see that a Berkeley was at this event. The owner quickly responded with the statement, "You must be Gerron Hite." I had never met this individual in person but had corresponded with him some five years ago! That is what makes this type of event great, meeting old friend and making new friends. A sad postscript is that the owner and organizer of this event stated this would be the last Story gathering. We hope he will reconsider his decision.

Thanks, Gerron, for contributing this article!

Have you joined the Internet microcar group? Great stuff! Lists, cars for sale, always something new. Subscribe by sending an email to the following address:
